Who Should Invest?

The FNB Namibia Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, - and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Historical Distributions

Month	Aug-19	Sep-19	Oct-19	Nov-19	Dec-19	Jan-20	Feb-20	Mar-20	Apr-20	May-20	Jun-20	Jul-20

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs. The FNB Namibia Money Market Fund is managed by Ashburton Unit Trust Management Company Ltd (89/485), a NAMFISA registered (25/9/5/3) Unit Trust Management Company.

Fund Commentary

The South African Reserve Bank has cut the Repo Rate by a further 25bps to 3.50% in its July meeting and the Bank of Namibia is expected to follow suit in August. June CPI readings came in low (2.2% in South Africa and 2.1% in Namibia, year-on-year) and should remain sticky on the downside, on the back of a low oil price, a recovering rand and low consumer demand.

The Namibian money market curve was supported by an increase in local Treasury-Bill rates, as National Treasury announced-, and started to roll-out its debt program. The Namibian three-month Wibar rate declined by 11bps, compared to a 24bps reduction of the South African three-month Jibar rate.

The fund remains defensively positioned with a high level of liquidity. Given its duration and maturity profile, we expect a gradual decline in yield, which will remain attractive relative to call rates and inflation going forward.

Past Performance

For the period ended 31 July 2020, annualised net of fees
