Total Expense Ratio (TER)	0.69%
Income Declaration	Accrued Daily, Paid Monthly

### Who Should Invest?

The Pointbreak Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

### Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, - and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Collective Investment Schemes in Securities (Unit Trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.

### Fund Commentary

The Federal Reserve is widely expected to cut its policy rate during September, following the ECB who implemented its first cut in June. Whilst the Bank of Namibia did surprise the market with early 25bps cut during August (Repo now 7.50%), we do expect the SARB to also cut its policy rate and to reduce the lag in rate between Namibia and South Africa back to 50bps.

South African bond yields were compressed further, gaining from the tailwinds of an improved growth and fiscal outlook, attracting mainly foreign investors. The long ends of the Namibian and South African money market curves were pushed down by approximately 35bps as FRA's keep on pricing cuts totaling 125bps.

The fund continues to diversify into the South African sovereign and commercial banking sector and remains well positioned for a monetary easing cycle.
