Initial Fee	None
Annual Management Fee	0.60%
Total Expense Ratio (TER)	0.69%
Income Declaration	Accrued Daily, Paid Monthly

### Who Should Invest?

The Pointbreak Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

### Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

### Fund Commentary

The US central bank-maintained interest rates at their recent highs, but cited weakness in the labour market as a sign of a cooling economy. The SARB MPC decided to hold the repo rate unchanged at 8.25% at its July meeting. Four members voted unchanged, while two members preferred a reduction of 25bps, signaling that a September 25bps cut in the SA Repo Rate is now widely expected.

Global and local inflation eased, but not yet in line with targets. The Namibian CPI moderated to 4.6% y/y in June from 4.9% in May, while the South African CPI slowed to 5.1% y/y in June from 5.2% in May. Similarly, in the United States, inflation also moderated to 3.0% y/y in June, lower than the May reading of 3.3%.

The US yield curve remains inverted, with longer maturity bonds still yielding less than shorter maturity bonds. The Namibia yield curve traded further downwards, driven by the strengthening benchmark bond yields as the markets continue to price in early rate cuts. The fund is well positioned for a monetary easing cycle.

### Asset Allocation

Weighted Average Duration - 155 days  
Weighted Average Legal Maturity - 155 days

Collective Investment Schemes in Securities (Unit Trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.
