Minimum Lump Sum	N\$ 100,000
Initial Fee	None
Annual Management Fee	0.60%
Total Expense Ratio (TER)	0.69%
Income Declaration	Accrued Daily, Paid Monthly

Fund Commentary

The South African Reserve Bank's Monetary Policy Committee left the repo rate unchanged at 8.25% during its meeting in May and we expect the Bank of Namibia to follow suit by keeping rates unchanged at 7.75% at their MPC meeting in June. Namibia's headline inflation rose to 4.8% y/y in April from 4.5% in March, in contrast to the South African headline inflation which surprised slightly on the downside, coming in at 5.2% y/y from 5.3% in March.

US inflation continues to be sticky, and the Fed maintains its tone of higher for longer rates. The yields on both the 10-year US and South African generic treasury bonds fell by 18bps and 11bps respectively. The excess bank liquidity position in Namibia remains elevated and money market yields remained stable throughout May.

The fund continues to diversify into the South African sovereign and commercial banking sector and remains well positioned for a monetary easing cycle.

Who Should Invest?

The Pointbreak Institutional Money Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.
